High performance, accurate and reliable shearing from AMADA

It is crucial that the flow of blanks, the starting point for the entire manufacturing process, is managed with utmost quality and speed. These two criteria are entrenched in the design and manufacture of AMADA's GS-II and GX-II sheet metal shears. The rigidity of the frame, as well as the drive and adjustment solutions, ensure an exceptional degree of reliability and safety of use. Beyond the technical considerations, these machines were developed with an improvement in working conditions, safety and ergonomics features in mind.
