Sawing machines - BEHRINGER - SLB240A - MACH-ID 8843

- Bowl volume 250 Liter
- Outer diameter 1200 mm
- Width of processing channel 260 mm
- Because of their ingenious bowl shape, the EC machines are the most versatile rotary vibrators in the Rösler product range: The relatively shallow, quarter turn incline of the processing channel allows the optimal processing and separation of small as well as large and bulky work pieces. Even delicate parts can be finished in our EC range
- Relatively shallow and short incline of the processing channel
- Slide-in separation gate or pneumatically activated separation flap
- Large separation screen; can be exchanged without the need for special tools
- Rösler two-speed vibratory motor with double conical mounting (1,500 und 1,000 RPM at 50 Hz); equipped with grease lubricated special heavy duty bearings
- Hot-poured PUR polyurethane lining with extra thickness in critical wear areas
- Flexible electrical controls and dosing technology
