

CNC Bed-type milling Machines - CORREA - NORMA 45 - MACH-ID 9886

CNC Bed-type milling Machines - CORREA - NORMA 45

MACH-ID 9886

Make CORREA
Type NORMA 45
YOP 2013
Control HeidenHain iTNC530

Specifications

X-Axis	4500 mm
Y-Axis	1250 mm
Z-Axis	1500 mm
Spindle speeds	4000 Rpm
Spindle Taper	50 ISO/Bt/Mk
Table Length	4800 mm
Table Width	1000 mm
Table load	10
Power on spindle	24 kW

Dimensions

Length	13150 mm
Width	4900 mm
Height	3625 mm
Weight	26000 kg

CNC Bed-type milling Machines - CORREA - NORMA 45 - MACH-ID 9886

The CORREA NORMA 45 is a high-quality, heavy-duty CNC bed-type milling machine manufactured in Spain by Nicolás Correa, a well-established European manufacturer of large industrial milling machines.

The machine is designed for precision machining of medium to large components, combining powerful milling capabilities, high rigidity and excellent accuracy.

Manufactured in 2013 and equipped with the proven HEIDENHAIN iTNC 530 CNC control, this machine offers a reliable solution for companies requiring flexibility, precision and productivity.

Who is this machine particularly interesting for?

- General engineering and subcontract machining companies: Machining large, complex components in small and medium production batches.
- Mould and die manufacturers: Machining large mould bases, tooling plates and precision components.
- Machine builders: Manufacturing machine frames, structural components, guideways and mechanical assemblies.
- Energy and power generation industries: Machining components for turbines, generators and industrial equipment.
- Steel fabrication and heavy engineering companies: Precision milling, drilling, boring and finishing of welded steel structures.
- Repair and maintenance workshops: Refurbishment and machining of large industrial components.

Main advantages

The CORREA NORMA 45 offers an attractive combination of European build quality, rigid machine construction and versatile CNC machining capabilities.

The HEIDENHAIN iTNC 530 is particularly appreciated by experienced machinists for its conversational programming, reliable operation and suitability for complex milling operations.

This machine is particularly attractive to subcontract machining companies, machine builders and manufacturers of large welded structures requiring accurate machining over a 4.5-metre working length.

- 3D measuring probe (prepared)
- UGA-2C Universal Automatic head 2.5 x 2.5 Degrees
- Torq spil 840 Nm
- HR 550 Handwheel
- Double chip conveyor
- Closed housing with HYPATIA 60 positions
